

BOREAS TE-11 SAP FLOW DATA

Summary:

The BOREAS TE-11 team collected several data sets in support of its efforts to characterize and interpret information on the sap flow, gas exchange, and lichen photosynthesis of boreal vegetation and meteorological data of the area studied. This data set contains measurements of sap flow conducted at the SSA-OJP site in the growing seasons of 1993 and 1994.

A guide document which includes more information about this data set can be found at http://daac.ornl.gov/boreas/TE/te11sapf/comp/TE11_Sapflow.txt.

ORNL DAAC maintains information on the entire [BOREAS Project](#).
